Wait he said they weren't crazy but they are the brain isn't functioning correctly

9:55am, Fri, Jan 27, 2017 by nikki

Just because the brain isn't completely functioning right doesn't make someone crazy

9:55am, Fri, Jan 27, 2017 by Logan

Why does he still feel his arm if is not there ?

9:58am, Fri, Jan 27, 2017 by Alondra

Why was he always in pain

9:58am, Fri, Jan 27, 2017 by Valerie

Amputees can still experience pain in the limb that has been lost

9:59am, Fri, Jan 27, 2017 by Isabel

Well think about it, if you just had your arm taken off and your mind still thinks its there wouldn't you feel pain?

9:59am, Fri, Jan 27, 2017 by Logan

How does his arm hurt when he shaves are his nerves in his face conected to his arm?

10:01am, Fri, Jan 27, 2017 by Andrew

How is it possible to feel something on your face but also feel it somewhere else?

10:01am, Fri, Jan 27, 2017 by Viviana

Doesn't he feel his arm because the nerves move to a different part of the body since there not used

10:02am, Fri, Jan 27, 2017 by nikki

The right somosensory cortex corresponds to the left side of the body and vise versa

10:03am, Fri, Jan 27, 2017 by Isabel

How do neuro-pathways change if he said once they are set they cant change ?

10:04am, Fri, Jan 27, 2017 by Rachel

How do you stop that pain?

10:06am, Fri, Jan 27, 2017 by nikki

Did he damage a nerve when he lost his arm?

10:06am, Fri, Jan 27, 2017 by Viviana

Forgot about this thing

11:38am, Fri, Jan 27, 2017 by Matthew
