Why do we want babies?

8:48am, Tues, Mar 7, 2017 by Armendáriz

Why do our bodies wanna make babys?

8:48am, Tues, Mar 7, 2017 by nikki

Why do our body's want to make babies?

8:48am, Tues, Mar 7, 2017 by Val

If the human body had trillions of cells in the womb than how many cells does a grown human have

8:50am, Tues, Mar 7, 2017 by Andrew

Can more then one sperm go in the egg? Is that how twins are made?

8:50am, Tues, Mar 7, 2017 by nikki

babies are biological imperative

8:53am, Tues, Mar 7, 2017 by g

How is it that women don't exactly know they're pregnant early, why is it that sometimes they find out weeks later?

8:53am, Tues, Mar 7, 2017 by Viviana

one of the ways twins are made

8:53am, Tues, Mar 7, 2017 by g

Why is having children a miracle?

8:53am, Tues, Mar 7, 2017 by Armendáriz

because it takes time for the changes to impact the mother

8:53am, Tues, Mar 7, 2017 by g

Is that how asexual works? Cloning?

8:54am, Tues, Mar 7, 2017 by Diana

If asexual rreproduction cloning then why haven't asexual species been wiped out by a virus?

8:56am, Tues, Mar 7, 2017 by Armendáriz

If each sperm is one of a kind, how is it possible to get twins?

8:56am, Tues, Mar 7, 2017 by Viviana

So the sperm is like different little people 😂

8:57am, Tues, Mar 7, 2017 by Val

Why do guys produce alot of sperm but women dont have many eggs at one time?

8:57am, Tues, Mar 7, 2017 by nikki

So if both chromosomes are the same than why is it that some people look like one parent more than the other

8:58am, Tues, Mar 7, 2017 by Andrew

So birds have sex in order to have an egg?

8:59am, Tues, Mar 7, 2017 by nikki

Are there such things as "strong" genes where family members consistently look very similar

9:00am, Tues, Mar 7, 2017 by Isabel

Is it possible to have a baby who doesn't look nothing like their parents?

9:01am, Tues, Mar 7, 2017 by Viviana

Even thoe were not born girls are already growing eggs?

9:01am, Tues, Mar 7, 2017 by Diana

Women are born with all the eggs ? So women cant produce any more eggs

9:01am, Tues, Mar 7, 2017 by Rachel

Sooo what happens if u dont have the sperm does it just fall out?😂

9:02am, Tues, Mar 7, 2017 by nikki

How do the sperms that survive know where to swim or what to do?

9:05am, Tues, Mar 7, 2017 by Diana

Do some sperms have more than one tail because of a mutations?

9:06am, Tues, Mar 7, 2017 by Andrew

How long can sperm live up to

9:06am, Tues, Mar 7, 2017 by nikki

Does the shape of the sperm determine the outcome?

9:07am, Tues, Mar 7, 2017 by Armendáriz

What happens if the sperms don't break through zona?

9:09am, Tues, Mar 7, 2017 by Viviana

If its so hard to get in the egg why do some people get prego so easy

9:09am, Tues, Mar 7, 2017 by nikki

Do all sperm have these proteins?

9:09am, Tues, Mar 7, 2017 by Armendáriz

Why do some fertilized eggs fail to develop ?

9:11am, Tues, Mar 7, 2017 by Rachel

So how are the cells created like how is the first one created?

9:12am, Tues, Mar 7, 2017 by Andrew

SO a motheres body can kill its own baby

9:14am, Tues, Mar 7, 2017 by nikki

Why do moms throw up when they're pregnant?

9:15am, Tues, Mar 7, 2017 by Viviana

Why do guys get morning sickness?

9:15am, Tues, Mar 7, 2017 by nikki

Is it becuse u have a cinnnection with ur partner?

9:15am, Tues, Mar 7, 2017 by nikki

Connection

9:15am, Tues, Mar 7, 2017 by nikki

How many months before a mother starts showing?

9:15am, Tues, Mar 7, 2017 by Diana

What causes the guy to be affected if the woman is pregnant such as nausea or cravings ?

9:16am, Tues, Mar 7, 2017 by Rachel

So our organs are just three different types of cells?

9:18am, Tues, Mar 7, 2017 by Armendáriz

What if one of the cells lets say the one that creates the heart is that what causes heart problems such as heart murmers?

9:18am, Tues, Mar 7, 2017 by Rachel

'sympathy' <https://www.scientificamerican.com/article/why-do-some-men-experienc/>

9:19am, Tues, Mar 7, 2017 by g

What happens if one of the three types of cells were to be damaged?

9:19am, Tues, Mar 7, 2017 by Diana

If a cell was damaged or missing\*\*

9:19am, Tues, Mar 7, 2017 by Rachel

good question...most of the time if something is 'wrong' at this stage, it's due to an existing genetic issue

9:20am, Tues, Mar 7, 2017 by g

Do stem cells have dna in them for example if it was possible to regrow hair from them would it be the hair color from the stem cells Dna

9:20am, Tues, Mar 7, 2017 by Andrew

Do proteins react to each other in the embryo?

9:22am, Tues, Mar 7, 2017 by Armendáriz

How does it become a boy or girl

9:22am, Tues, Mar 7, 2017 by nikki

Who decides if its a boy or girl

9:22am, Tues, Mar 7, 2017 by nikki

Can a child have more genes from one parent than the other? Or does the child get the same amount from both parents?

9:23am, Tues, Mar 7, 2017 by Viviana

Ideally, 23 pairs from each parent; there are times something goes wrong and the parents give the wrong number (either more or less)

9:25am, Tues, Mar 7, 2017 by g

Is it possible to be yy?

9:25am, Tues, Mar 7, 2017 by Armendáriz

Why is it that the size and shape is different depending on the sex?

9:26am, Tues, Mar 7, 2017 by Viviana

no yy isn't really possible

9:26am, Tues, Mar 7, 2017 by g

all the genes look different

9:26am, Tues, Mar 7, 2017 by g

Like if it's a girl the belly's little and if it's a boy the belly's big and low

9:26am, Tues, Mar 7, 2017 by Viviana

Why isn't yy possible? What would happen if it's created?

9:27am, Tues, Mar 7, 2017 by Armendáriz

because the female is 'xx' and can only give an x...if the female is not 'xx' they are sterile

9:28am, Tues, Mar 7, 2017 by g

If a baby were to kick alot can it damage one of its moms organ?

9:28am, Tues, Mar 7, 2017 by Diana

How can a miscarriage happen ?

9:28am, Tues, Mar 7, 2017 by Val

How do some babys get the cord wrapped around their neck

9:28am, Tues, Mar 7, 2017 by nikki

Why does smell affect the mother?

9:29am, Tues, Mar 7, 2017 by Armendáriz

When your pregnant do your senses get stronger like smelling?

9:29am, Tues, Mar 7, 2017 by Diana

**Are pregnant women's sense actually heightened or is that a myth**

9:30am, Tues, Mar 7, 2017 by Isabel

**So the embryo gets its food from the mother's blood?**

9:30am, Tues, Mar 7, 2017 by Andrew

**yes**

9:30am, Tues, Mar 7, 2017 by g

**Where does the baby revive air**

9:31am, Tues, Mar 7, 2017 by Isabel

**From in the womb**

9:31am, Tues, Mar 7, 2017 by Isabel

**senses aren't actually heightened**

9:32am, Tues, Mar 7, 2017 by g

**oxygen is carried by the blood**

9:32am, Tues, Mar 7, 2017 by g

**Does the baby's presence change the mother's chemical balances?**

9:32am, Tues, Mar 7, 2017 by Armendáriz

**yes...hormones go wild**

9:34am, Tues, Mar 7, 2017 by g

**How is it possible for the baby to fit in the Stomach?**

9:36am, Tues, Mar 7, 2017 by Viviana

**So when it develops the mylon can the baby somewhat process thoughts?**

9:36am, Tues, Mar 7, 2017 by Andrew

**potentially...**

9:38am, Tues, Mar 7, 2017 by g

**How does the baby ger though 4inch hole does it just rip?**

9:38am, Tues, Mar 7, 2017 by nikki

**the skin stretches and the uterus, which holds the baby, grows with the baby and pushes the other organs a bit**

9:38am, Tues, Mar 7, 2017 by g

**Do you have to break or cut something to have a baby?**

9:38am, Tues, Mar 7, 2017 by Armendáriz

**sometimes the skin does rip, but everything stretches a bit**

9:38am, Tues, Mar 7, 2017 by g

**this is also why babies have fontanel**

9:39am, Tues, Mar 7, 2017 by g

**What if a mother broke her pelvis when she was pregnant**

9:39am, Tues, Mar 7, 2017 by Andrew

**the pelvis pushes apart during child birth**

9:40am, Tues, Mar 7, 2017 by g

**Can u accidently poop when ur pushing?**

9:41am, Tues, Mar 7, 2017 by nikki
